

# ONDA

## Description

Onda is the new range of compact Saeco capsule machines. Modern design, robust metal lever, with the possibility of versions in other colors. It is also very versatile: the Allcap brewing unit is modular and can be adapted to different types of capsules on the market (specific capsule format version from production).

Onda is available in 2 versions: Standard, with manual lever and start & stop button, and Dosata, always with manual lever but with automatic coffee dosing system. The grill is adjustable in height in two positions, for coffee cups and cups/long beverages. Then, by joining Onda to Milky, which quickly prepares hot or cold frothed milk or hot milk, the offer can be completed by tasting creamy drinks made with fresh milk. The jug has a capacity of 150 ml and is easily removable and washable.

## Accessories

- Milky frother
- Chip Card
- Bluetooth kit

## Main features

- Compatible with various types of capsules (Espresso Point®\* or Nespresso®\*)
- Automatic coffee dosing (Dosata version)
- Height-adjustable grid in 2 positions (coffee cups and cups)
- Metal lever
